WESLEY MAST SHOWS OFF THE GRAND CHAMPION steer of the Sixth annual Pennsylvania Livestock Exposition Discussing the merits of the angus are judge Don L. Good, left, and Jacob Mast, father of Wesley The 1055 pound black took grand championship honors in the junior show on Monday and came back on Tuesday to beat out all open class competition The steer, dubbed Kinney II, was one of three Angus steers exhibited by Wesley. He won the Angus championship in all three weight classes of the junior show. L F. Photo

Wesley Mast Has Champ Steer At Pa. Stock Show

Wesley Mast Elverson R1 was the big winner at the Pennsylvania Livestock Exposition this week in Harrisburg

The 18 year old son of Mr and Mrs Jacob Mast showed the Angus champion in each of the three weight classes at the 4-H steer show on Monday and went on to exhibit his summer yearling to the grand championship of the junior show

The blocky black beat out the Hereford champion shown by Jacob Rhoades, Haymarket, Virginia, and the shorthorn champion exhibited by 10 year old Donna Hess of Strasburg R1 The daughter of Mr and Mrs Elvin Hess Jr was showing her first steer

On Tuesday Wesley took his steer, Kinney II, to the top of the open class competition and the grand championship banner of the exposition

At the sale of show steers on Wednesday, Auctioneer Abe Diffenbach extracted the second highest price in the six year history of the show for Mast's grand champion A B Hollinger and Son Lancaster paid $2 10 per pound for a total selling price of $2,215 50

(Continued on Page 5)

Crouse Wins Hay Show Second Consecutive Time

Galen Crouse Stevens R1, exhibited the grand champion sample of hay in the seventh annual district hay show at Hershey on Wednesday The win was the second consecutive grand champion for the county dairyman

Crouse took the championship with a bale slice of leafy fine-stemmed fourth cutting alfalfa The sample was the best cured champion of the show

J E Lanius and son of York County had the champion field cured sample which was a bale slice of second cutting grass

In addition to the championship exhibit, Crouse exhibited three other first place winners and one second place winner in class competition Crouse won first place awards with first cutting alfalfa second cutting grass and mixed hay with over half legumes He took second place in the first-cutting-grass class

In the field cured classes, Mahlon Shenk Holtwood R1

Pennsylvania Tomato Growers Get Less Per Acre Than Others

Pennsylvania tomato growers received a lower average gross income per acre than most of the other six major tomato growing states, Barney Slamp, marketing Specialist from the Pennsylvania State University said Thursday night

Speaking at a "tomato roundup' sponsored by the Pennsylvania Marketing Association, an affiliate of the Pennsylvania Farmers Association, Slamp said only Indiana, of the major producing areas had a lower gross income per acre on tomato last year than did the Keystone State

Gross income per acre was $564 in New Jersey, $504 in Ohio, $466 in California, $438 in New York, $394 in Pa , and $330 in Indiana In the United States as a whole, the average was $419.

Slamp said this is the kind of information needed to bargain for the full market price He said a marketing organization might not necessarily bring higher prices to the producer, but it should enable the farmer to ask and receive a fair market price

Wayne Tyler, field director of the American Agricultural Marketing Association said 21 states now have joined the AAMA and are in the process of organizing state associations and signing up farmers He feels the time is near when growers can have enough combined bargaining power to meet processors on an equal basis to contract for prices before the crop is planted

Tyler said, "The American Farm Bureau Federation (the parent organization of the

Manheim FFA Sets Meeting For Initiation

The Manheim Chapter of Future Farmers of America set November 8 as the date for formal initiation of Greenhands into the chapter at a recent meeting of the chapter in the Manheim Central High School

At the November 8 meeting David Graybill will show pictures he took on the trip to the West Coast last summer The trip was sponsored by the chapter and has become an annual affair for the graduated seniors.

November 20 was selected as the date for elevating the present Greenhand members to the degree of Chapter farmers

John Swanger was elected to fill the unexpired term of assistant chaplain which was vacated recently

John Myer, Clarence Hoffer and Jerry Stohman were appointed to a committee to make arrangements for election of a Chapter Sweetheart

John Wagner and Gerald Waltz were appointed to a committee to serve with the advisors, Mr Joseph McGahen and Mr Harold McAllister in arranging for a winter recreation porgram in the school Gym.

The group voted to serve refreshments at the next meeting

Cooperation Of Effort Asked At Seed Conference

HERSHEY — Land-grant universities throughout the United States were cited by two speakers Tuesday at the 44th annual convention of the International Crop Improvement Association for their tremendous contribution to American agriculture' through research

C R Porter, Lincoln Neb, manager Nebraska Hybrid Seed Growers Association declared this work by the agricultural experiment stations "has been a major reason for the world-leading efficiency of United States agriculture"

The whole agricultural industry and the national economy, " stand to gain," Porter declared, "from an aggressive, well balanced experiment station research program"

LANCASTER POULTRY CENTER

Growers Resist Drop

Broiler prices at the Lancaster Poultry Center this week averaged 14 56 as 46,400 head in nine lots changed hands at prices ranging from 14 4 to 15 0. The average price at the November 8 sale was 2 67 lower than the average of 17 23 last week.

Growers expressed their displeasure at the lower price by putting the "No Sale" sign on 12 lots containing 41,000 birds at bids ranging from 13 to 14.8.

Two lots of 1,300 leghorn fowl brought 8.3 to 8.4 while 1,700 heavy fowl in two lots brought 16.6 to 16.7. Three lots of pullets sold for 23 and 24 for the 2,200 head, and 4,800 roasters in four lots brought 22.2 to 26.4.

A lot of 400 tom turkeys were withdrawn at a bid of 19.0 and a lot of 450 turkey hens did not sell at the offered 27.2.

The complete auction offered 100,750 head in 36 lots and sold 56,500 head in 20 lots.

Following is the complete sale report with lot number, seller, grower in parenthesis, amount and breed, age in weeks and days, buyer and price

Delmarva

Price Decline Continues

Prices of live broilers continued to decline slightly in Demarva during the 24 hour period ending 10 30 Friday morning

At farm prices ranged from 14.5 to 15 4 during the period At these prices 374,000 head of 404,100 head offered were sold Thursday at the Eastern Shore Poultry Producers Exchange in Shelbyville Del.

A fair demand took the light supply. With practically no plants operating today, Eastern Shore processors estimated slaughter at 558,000 head compared to 685,000 head last week end.

The Delmarva broiler-feed ratio for the week ending November 2 stood at 3.5 — this down one point from the 3 6 of the previous week. Broilers during the week averaged 16 7 per pound and 20% mash cost the grower $94 94 per ton.

The ratio for the comparable week a year ago was down to 2 7 when broilers averaged 12 38 and mash cost $90 82 per ton

Protect Livestock

Keep livestock out of fields where there is frosted sudan grass or sorghum, warns Dr. Sam Guss, Penn State extension veterinarian. A few mouthfuls of this frosted forage can kill cows When the plants are frosted, deadly poisons are formed In case of poisoning, early treatment is a must The same thing applies if your animals should eat wild cherry or choke cherry leaves which are frost damaged.

From Where We Stand . . .

Grain Storage Can Mean Extra Profit

Most livestock producers and dairymen in Lancaster County will be purchasing some hay this winter, and many will have to buy some grain as well.

However, many corn growers in the county were pleasantly surprised when they began harvesting their corn crops this fall.

We have heard of reports of farmers in the southern end of the county averaging 125 bushels an acre in spite of the drought conditions during most of the summer.

Some of these farmers may even have more corn than they need to meet their feed requirements, even though they will be feeding heavier grain rates in an effort to help make up the hay shortage.

Some farmers will probably be tempted to sell their excess corn as soon as it is cribbed, and there are some advantages to selling without a long storage period, but statistics in past years show there is very little price risk involved in storing corn for five or six months.

Naturally there are some risks of loss from spoilage and from rats and mice, but with the storage available on most farms, or with the good temporary storage facilities available at reasonable cost, the losses in storage can be cut to a minimum.

Over the past 10 or so years, farmers have been able to make an average of 10 to 15 cents a bushel over storage costs. During the same years, the price average increased nearly 22 cents a bushel three months after harvest time. In most cases this was more than a 17 per cent increase over the price at harvest time in October or early November.

What are the chances that the price increases will come this year? Marketing specialists say that as long as this area remains a grain deficit area (using more corn than we grow) we can expect seasonal price advances that will at least cover storage costs.

A common question is what does it cost to store corn. Like all other costs, this varies widely from farm to farm.

About half the cost will be the storage facility itself. This is a fixed cost whether or not you use it. Annual fixed cost of a bin or crib is likely to run about 5½ to 8 cents a bushel. The variable costs include interest on money invested in the stored crop, damages and losses (you never take out quite as much as you put in), insurance, and the added cost of handling the corn into and out of storage as compared with selling directly out of the field.

Total costs of storage for three or more months will run somewhere between 11 and 16 cents a bushel. Since the average seasonal price advance has been 22 cents for several years, there is a chance for a 6 to 11 cent a bushel profit.

On a 100 bushel yield, that figures out to a six to eleven dollar an acre profit, and that might be some of the easiest money you made farming all year.

At least that's how it looks from where we stand.

Agriculture Advances

American agriculture has advanced more in the past 50 years than in all the prior years of our history. Modern farming, combined with a progressive system of marketing, processing and merchandising is providing more food for Americans for less money than ever before.

In spite of this, the non-farm public takes it for granted that food should be cheap when all other items which make up our living expenses are much higher in comparison.

The foundation for continuing agricultural advance, which reach from farm to market, to home, or industry, is two-fold. It depends on research and the hard work and ingenuity of farmers.

Agriculture is big business. There is an investment of $21,300 for each farm employee as compared with $15,900 for each worker employed in manufacturing and industry. The biggest of our nation's industries is composed of 3.7 million independent producers. That's the number of farmers shown in a recent report of the Census Bureau. These farmers and their employees feed America . . with one person employed in agriculture to 27 non-farm persons. In Russia, the comparison is one farm worker to two and one-half persons. What a contrast!

Never before have so many been fed so well for so little and with such great efficiency as in America. This is the success story of this decade.

★ ★ ★ ★

Dangerous Trend

A new and disturbing form of integration — from the egg buyer back to the farm level, on a coercive rather than a voluntary basis — has been reported to us recently. If there is much of it taking place hatcherymen and freedom may be forced into some sort of retaliation. And, once again, the producer will be caught in the middle.

To put the matter in its barest terms, the egg buyer tells the producer, "I'd like to go on buying your eggs, but I can use only eggs produced by a certain strain of layers, fed on a particular brand of feed. I'll sell you the chicks and the feed and buy your eggs."

It is hard for us to believe that only one kind of feed and one strain of layers can produce the quality of eggs that such a buyer must have for his outlets. It is not hard to believe that he stands to make a three-way profit from his producers when he insists on selling them the laying stock and feed before he will buy their eggs.

In all previous "quality programs" that we have heard about the producer has been offered a choice of perhaps four or five different strains and the same number of feeds — all of which would produce eggs of comparable interior quality and yolk color.

A producer who is "offered" this type of deal by his buyer should pass along the word to excluded feed dealers and hatcherymen in the area — and make every effort to locate a new buyer.

Everybody's Poultry Magazine

Don't Store Eggs In Heated Rooms

It may be all right during the summer, but egg producers should find a better place than a heated basement to store eggs during the winter, says Carl O Dossin, Penn State extension poultry specialist.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Bible Material: Genesis 1: 26-31; Psalm 8; Matthew 6:24-34; Hebrews 2 6-18.
Devotional Reading: Hebrews 2 6-18.

Man

Lesson for November 11, 1962

MOST people would call the Bible a book about God; and this is true. But there is something just as true, and for us very important: it is a book about man. Just as there are truths about God that will not be known unless God reveals them, so there are truths about man that have to be shown us. The race of man has seldom taken itself seriously enough. Men suppose they are like the beasts that perish: today here, tomorrow gone, and nothing else to be said. Men think their lives are so short and insignificant that it does not matter to any one what they do. Men have thought of themselves as so tied to this planet Earth that when it dies we shall die with it. Men have seen that we are animals, and so they think we need no more than animals do, food, a roof, a little place in the sunshine. What's right or wrong for a beast is right or wrong for us . . . and so forth.

Dr. Foreman

Man the Master

The Bible gives no encouragement to any such mistakes. Man is much higher than a mere "higher animal." He is first of all a creature of God, that is the key to the meaning of his existence. "Thou hast made him," the poet-psalmist cries. This alone gives man a glory. The same hand that wrought the universe, the same Mind that conceived the galaxies, are the mind and the hand that designed and developed man and mankind. Not only so, but God has made man only a little lower than God, so far as this earth is concerned. On this earth, our home, God has set man as the master of all. Every living thing is placed under the control of man. Much that man does, especially the good that man does, is part of his continuing age-old struggle to be what God created and intended him to be: master of life on this planet. Every hospital you see is a battle-ground, a part of the long war against the tiny living things that cause disease,—germs and viruses. When you see a wheat field or a water tower, you see signs of man's conquest of hunger and thirst. When you see a clothing store, or turn on your furnace or light the wood in your fireplace, you are looking at part of man's long war with the climates in which he lives. Man is not meant by the high God to be the victim of his environment but to rise above it and control it.

Man the Slave

But that is not the whole story. The meaning of man is not to be found in his conquests alone, but in his service. Some master he must have. Man (it has been said) is "incurably religious." That is to say, some God man must have. He has a kind of worshipping instinct. The strange thing is that man is often found devoting himself and his talents to what is actually below him.

Jesus put it memorably: You cannot serve God and mammon; in other words, you cannot serve God and money. To serve God is to fulfill the purpose for which you were created. To serve money, to serve things, is to be a slave of what should serve man, not ride him. Whatever a man hangs his heart on and depends on, that is God to him; said Martin Luther. Strange how many idols man makes for himself!

Man the Spirit

Another mistake men make about themselves is to confuse themselves with their bodies. This is a natural mistake, because whatever we do or think, we can do or think only with the aid of our bodies. But that does not mean that the body is the most important part of us. It does not rate our major concentrated interest. It does not deserve the pampering we give it. Jesus asks why we put so much thought on caring for our bodies.

A lady selling a young people's encyclopedia went by appointment to a beautiful home where lived a family with several children. The lady of the house did not want the encyclopedia; too expensive, she said. Her visitor pointed out: "As I came up the drive I noticed about $200 worth of play equipment—bicycles and what not—in the yard. Why do you spend all that for what's below their necks and begrudge the same money for their minds?" And she might well have added: "And how much do you spend for their souls?"

Now Is The Time . . .

BY MAX SMITH

MAX M. SMITH

To Test Forage Crops

The forage testing program is available for every farmer in the state, at this time of the year when the winter feeding program is ahead it is suggested that both dairy and livestock producers test their hay and silage, the quality of these forage crops will determine the kind and amount of grain that should be fed Due to the dry season, some roughages may be poor in quality and therefore, difficult to balance with a grain ration unless a test is made.

To Control Cattle Lice

Many weeks of cold weather and heavy hair coats are ahead for all kinds of cattle; in order to prevent a serious infestation of cattle lice, it is best to treat the animals in the fall if any lice are detected Use rotenone or pyrethrum sprays or dusts on milking cattle; on beef cattle or cows not milking use lindane, co-ral, methoxychlor, or Ronnel Repeat the application in 12 to 14 days

To Provide Outside Exercise For Breeding Animals

All breeding animals should be allowed outside daily exercise, this is just as true in dairy cattle as it is in herds of sows or flocks of ewes. This exercise provides animals comfort, maintains health, and enables the animals to produce larger and stronger young

To Eliminate Rats and Mice

Rodents take a heavy toll each year and are a menace to the health of both man and beast There is little excuse for a heavy infestation of either rats or mice. First, keep the premises clean and free from junk piles and other rodent-harboring places Place bait stations throughout the buildings away from children and livestock and keep well stocked with a variety of poisonous baits Good farm management does not include any place for a heavy population of either rats or mice; they should be eliminated.

Where Wool Goes

If the five hundred and thirty-three million pounds of wool used in the United States last year were divided equally among all American families, your family's share would have been about twelve pounds About four pounds of wool produced in the United States and four and a half pounds of imported wool went into your family's clothing, blankets, draperies, and upholstery The other three and a half pounds . . . . almost entirely imported . . . was carpet wool and was used for floor coverings.

● Livestock Show

(Continued from Page 1)

Record for the show was the $2.20 paid to the Pennsylvania State University for an angus grand champion in 1959

Two of Wesley's steers featured prominently in the sixth consecutive Lancaster County win in the county-group-of-five steers contest The other steers, all Angus, in the county group were shown by Rose Marie Linton, Quarryville R2, Wilbur Hosler, Manheim R3, and Nancy Rohrer, Lititz R3

The only other countian to break into the ranks of the championships was C Warren Leininger who showed an April-farrowed spotted boar pig to the reserve championship of the show

Other swine exhibitors and their winnings included W F Ruoss, Ephrata R2 a ninth and 14th place in Duroc breeding swine classes, and a 10th place in market hog classes, John W Eby and Son, Gordonville R1, a first, sixth, and 10th in Duroc market hogs George E Cogley, Ronks R1, a second, fifth, and ninth place in Yorkshire market hogs In addition to the reserve champion, Leininger had a fourth place with a March boar pig and two third places and three fourth places with gilts in the Spotted Hog breeding classes He placed seven market hogs between fourth and seventh places.

THE SIXTH CONSECUTIVE CHAMPIONSHIP in the county group competition at the Pennsylvania State Livestock Exposition was won this week by the Lancaster County contingent The team of five 4-H Angus steers were shown by, left to right above, Mae Mast, (showing a steer entered by her brother Wesley) Wesley Mast, both of Elverson R1; Nancy Rohrer, Lititz R3, Rose Marie Linton, Quarryville R2, and Wilbur Hosler, Manheim R3 The county has never been beaten in the six year history of the show. L. F. Photo.

Mrs Milton K Morgan, 1916 New Holland Pike, the only sheep exhibitor from the county brought home a second place, ribbon and ribbons for 6, 7, 8 and 9th places in Suffolk breeding classes

In the national Suffolk sheep Association awards, Mrs Morgan won a fifth place award for her ram lamb, and a sixth place ribbon for her ewe lamb

● Seed Conference

(Continued from Page 1)

Efficient production of quality produce, coupled with modern marketing programs, is essential for the success of any segment of agriculture, Dr William L Henning, State Secretary of Agriculture, declared Monday in addressing the opening session of the convention in Hotel Hershey Secretary Henning said that 'as agriculture becomes more complex and specialized, it also becomes more competitive, both with other industries and within its own framework"

Quality control he added, is of 'paramount importance' He cited the state's quality control program in certified eggs some of which were served at a Pennsylvania breakfast and called attention to similar state safeguards in oher commodities notably milk and meat

Dr Henning commended the ICIA for setting up desired uniform standards in seed certification for all of the principal farm crops He said certified seed in itself is an important industry, and "even more important as a basic factor in the total phase of agricultural production and of agricultural efficiency"

He named eleven different crops — corn wheat barley, oats grasses potatoes, tobacco, vetch, grape plants, tomatoes, and celery — that are embraced in Pennsylvania's seed certification, a program handled by the Agriculture Department's Bureau of Plant Industry

New Jersey Agriculture Secretary Phillip. Alampi, of Trenton, N J, declared "the American farm economy has contributed much toward sustaining our leadership among world powers"

He added, however, that our success in fulfilling this responsibility seems to have dulled the interest of those who have profited most. Long spared from the threat of hunger, and enjoying the greatest abundance and choice of both essential and luxury foodstuffs, many of our people are forgetting the significance of the bounty they enjoy"

He urged the seed scientists and seed certification authorities attending the convention to help acquaint the public "with the full story of the research, the skills and enterprise contributed by all segments of agriculture to make this abundance possible

Since this is an "off-year" Tex

Divert Acres In Wheat Plan Farmers Warned

Farmers who are going to take part in the 1963 wheat stabilization program should be careful to sign up only as much acreage as they intend to divert, Fred G. Seldomridge, Chairman of the Lancaster County Agricultural Stabilization and Conservation

in association elections, all officers will carry over for 1963 Next year's meeting a joint session with the American Association of Seed Analysts, will be at Galveston, Tex

Committee, said today.

The signed acreage for 1963 will be a binding agreement, the Chairman explained, and farmers will have to divert the full acreage for which they sign up in order to be eligible for any payments — including diversion payments, the regular price support loans or purchase agreements, and the extra wheat price-support payments.

"This is a change from the 1962 program," Mr. Seldomridge declared "Under the 1962 wheat stabilization program, a farmer could sign up for 30 acres, and then divert only 20, and still earn payments on the acreage he actually diverted

HEAVES DON'T BOTHER ME

When I eat New Hope Complete Horse Feed

No other feed compares with New Hope for effective relief of heaves and allergic conditions.

In use for over five years, it has helped to restore hundreds of horses — even those that had been given up for lost — to sound, healthy condition. New Hope Complete Horse Feed gives you all-in-one feeding that is simple and easy. No need for tiresome soaking of beet pulp, no need to feed hay because this complete feed has everything for the horse's nutritional requirements.

● Tomato Growers

(Continued from Page 1)

AAMA) is the important factor in the program No other group has the capacity to do the job."

He said production has been getting a lot of attention, but marketing has too long been neglected "We need to do this job of bargaining or someone else will do it if we don't" he said

He said the other agencies which might do the job if farmers fail to organize for bargaining, are labor unions and the federal government — through the use of marketing orders

"We believe many more agricultural products — perhaps all — will be produced under contract in the future. If this comes, we will be prepared with a marketing organization" Tyler said

Other speakers at the meeting of some 35 growers from seven southeastern Pennsylvania counties included Wesley Haer, manager of the Pennsylvania Marketing Association John Bittinger, chairman of the State Advisory Committee and Gerald A Biggs, president of the Pennsylvania Farmers Association

POULTRYMEN....

HOW IS YOUR WINTER I. Q.?

Cold Weather Is Coming! Are You Ready?

USE THIS CHECK LIST . . .

- √ Have you drained your water pipes on range?
- √ Are the heating cables on your water lines insulated?
- √ Check time clocks on your lights.
- √ Proper bulbs? Are they clean?
- √ Do you have extra feed in case of bad weather?
- √ Are your thermometers placed?
- √ Is your litter deep enough?
- √ Is your heating plant in proper condition?
- √ Is your ventilation equipment in good shape?
- √ Are your windows fixed? Clean?
- √ Do you have closures on bulk tanks and openings to prevent condensation in your feed?
- √ Is your auxiliary generator checked?
- √ Have you checked the thermostats on your brooding equipment?

Question?

Can you afford to wait to do all this on a real cold morning, or is it cheaper to — Do it Now?

REMEMBER . . . .

EARLY BIRD FEEDS AND GOOD MANAGEMENT ARE THE WINNING COMBINATION FOR ANY POULTRYMAN

What's In A Potato?

By Mrs. Richard C. Spence

Plenty of vitamin C can be found in potatoes' Research home economists have been studying the vitamin C content as related to raw potatoes, fresh mashed potatoes and reconstituted dehydrated potatoes.

And here are some of their findings — 1) Storage, cooking-mashing, and processing decrease the vitamin C content; 2) Raw potatoes have the highest vitamin C content. And new potatoes have more than old, 3) Fresh mashed potatoes made from raw potatoes contained only about half as much vitamin C as the raw potatoes; 4) Reconstituted granules have but one-fourth as much vitamin C as do raw potatoes.

Although potatoes do not have as much vitamin C as some fruits and vegetables, they can make a good contribution to a person's daily quota. This is especially true for people who are big potato eaters

GOLD DIGGERS' POTATOES WITH BACON

- 1 pound bacon, cooked
- 3 medium potatoes, cooked
- 2 tablespoons butter or margarine
- 5 eggs
- ¼ cup milk
- 1 teaspoon salt
- ⅛ teaspoon pepper
- ¼ cup chopped fresh parsley
- ½ cup shredded cheddar cheese

Cut unpared cooked potatoes into ¼ inch slices Melt butter in 10 inch skillet Arrange potatoes in a single layer in skillet Beat together eggs, milk, salt and pepper Pour over potatoes Cover, cook over low heat for 15 minutes Uncover and place under broiler until top is browned, about 2 or 3 minutes Turn upside down on round plate Sprinkle with mixture of parsley and cheese Serve with crisp bacon

PORK SAUSAGE AND POTATO CASSEROLE

- 1 pound skinless pure pork sausage links
- ¼ cup chopped onion
- 2 tablespoons chopped green pepper
- 2 tablespoons flour
- 1½ cups milk
- ½ teaspoon salt
- 5 to 6 medium potatoes, sliced thin (cooked)
- 4 slices pasteurized process cheese

Pan-fry sausage in skillet until just brown. Remove sausage links Drain off fat leaving 3 tablespoons of drippings in skillet. Add onion and green pepper and cook until tender. Remove from heat. Blend in flour. Add milk gradually, stirring constantly. Add salt and cook over low heat, stirring until thickened Stir the potatoes into the thickened gravy Pour half the potatoes into a buttered 2-quart casserole dish. Place slices of cheese over potatoes Add remaining potatoes and gravy Top with browned sausage Bake uncovered in moderate oven (350 degrees) 25 to 30 minutes

* * * *

SAUSAGE BAKED POTATOES

- 5 potatoes, baked
- 1¼ cups milk, heated
- 3 tablespoons butter or margarine
- ½ cup shredded sharp cheddar cheese
- 3 tablespoons chopped onion
- 1 teaspoon salt
- ½ teaspoon pepper

Cut baked potatoes in half lengthwise. Scoop out cooked potato into a bowl. Mash with milk and butter or margarine. Blend in cheese, onion, salt and pepper Spoon into potato shells. Top each shell with a brown 'n serve sausage link. Place in a shallow pan in a very hot oven (450 degrees) 10 minutes, or until sausage is brown.

* * * *

CORN CRISPED HAM AND POTATO PATTIES

- 3 cups ground cooked ham
- 1 cup seasoned mashed potatoes
- 1 tablespoon finely cut parsley
- 4 cups corn flakes OR 1 cup packaged corn flake crumbs
- ½ teaspoon seasoned salt
- ½ cup evaporated milk

Combine ham, potatoes and parsley. Shape mixture into 10 patties. If using corn flakes, crush into fine crumbs. Combine corn flake crumbs and salt. Dip patties in evaporated milk, then roll in seasoned corn flake crumbs. Place patties in shallow baking pan lined with aluminum foil. Bake in moderate oven (375 degrees) about 15 minutes. Serve with hot mustard or horseradish sauce.

* * * *

COTTAGE FRIED CHEESE POTATOES

- ¼ cup (½ stick) butter
- 4 cups (about 3 medium) thinly sliced potatoes
- ¾ cup (3 ounces) crumbled Blue cheese
- Freshly ground pepper

In a skillet or ovenware frypan, melt butter. Fry potatoes until golden brown and most

of butter is absorbed. Continue to fry, shaking the pan constantly, until potatoes hold together and a crisp crust is formed (and thus making a cake of the mixture). Turn out, upside down onto an ovenware platter. Sprinkle with Blue cheese and place under broiler until cheese melts and browns slightly. Season with freshly ground pepper. 6 servings.

VARIATIONS: 1) Cheddar: Substitute 1 cup shredded Cheddar cheese for the Blue cheese. 2) Cheddar-Blue: Substitute ½ cup shredded Cheddar cheese and ¼ cup crumbled Blue cheese for the ¾ cup Blue cheese. 3) Cheddar-Provolone: Substitute ½ cup shredded Cheddar cheese and ½ cup shredded Provolone cheese for the Blue cheese.

EGG AND POTATO SCRAMBLE

2 slices bacon
4 medium-size potatoes, sliced thin
1 teaspoon salt
4 eggs, beaten
¼ cup milk
Pepper

Fry bacon slices and remove from fry pan. Fry potatoes in the fat until they are well browned, sprinkling with salt as browning starts. Cover pan closely. Cook over low heat until potatoes are tender. Combine eggs, milk and pepper. Pour over potatoes in pan and cook slowly, stirring occasionally, until eggs are set. Crumble bacon slices and add just before removing from heat. Serve at once.

FOR VARIETY: Bits of cooked ham, chipped beef, small cubes of cheese, flaked of smoked fish, or any cooked meats may be used in place of the bacon in this recipe. If cheese or fish are used, use 2 tablespoons of fat or oil for frying potatoes. Thin slices of sausages or chopped chicken livers are especially good. Fry the potatoes in bacon fat or other meat drippings when omitting the bacon.

Ladies, Have You Heard? . . .

By: Jane Thurston, Extension Home Economist

Buying Guides For Bath Towels

THURSTON

When buying new bath towels, consider absorbency and strength of towels as well as bathroom color scheme.

For best absorbency, look for cotton terry towels with large, thickly packed loops. For strength, check the underweave. It should be firm, close, and tight to give the longest wear.

Buy the best towels you can afford and you still won't be paying a high price for quality. You can get excellent quality, long-wearing cotton terry towels, in stylish colors and designs at medium prices.

Besides floral prints, new towel sets come in checks, stripes, diamond patterns, and medallion or filigree designs.

Ginger Cookies — Astronaut Style

Update the children's familiar gingerbread men. Make gingerbread astronauts. Before baking, make belts on the cut-outs with raisins or currants. After the cookies are baked and cooled, draw goggles and space suit outlines on them, using a confectioners' sugar icing.

Over 400 Farm Women from the 24 societies took part in the convention. L F. Photo

Local Company Sponsors Meet On Feeding

What is being billed as "an exciting new discovery in dairy nutrition" will be discussed at a meeting of dairymen next Tuesday night at the Landisville fire hall

Dr William L Ensor, manager of dairy feed research with the Quaker Oats Company will discuss research of a new feed concept called a Catalyzer which he did at the University of Maryland

The process, basically, makes it possible for the first time, he says, to increase the calories of energy available to the dairy cow without increasing the amount of ration fed The processes were perfected at the Full-O-Pep research facilities in Barrington, Ill he said

Closely controlled experiments revealed cows fed the new concept feed produced about 20% more energy from the same amount of feed Moreover, this extra energy is converted into extra milk — up to 10% or more over cows on regular feed, and this margin is sustained throughout the lactation period.

Wilbur Hiestand of the S H Hiestand Co, Salunga, says that this new concept in dairy feeding does not involve the use of drugs or hormones The feed is palatable and you follow your regular feeding and management practices

The meeting, sponsored by S H Hiestand and Company will begin at 7 30 p m

● Local Girl

(Continued from Page 1)

ty girls, all winners from district contests, competed.

Theresa,, 17, made the suit as a project in the Home Economics class at Penn Manor High School.

Theresa made an attractive rust colored suit fashioned with a straight skirt and cardigan type jacket with three quarter length sleeves. Her blouse of cotton and acetate blend in olive, rust and deep pink was of the same material used in lining the suit. She made a three-band clamp hat of the suit material accented with a bow of the lining material She wore black gloves and shoes during the contest modeling.

Theresa, a past president of the Penn-Manor Future Homemakers club is now an officer in the county Association of FHA She is active in the Dramatics Club, the Glee Club, and the Future Teachers of America.

A senior girl scout and assistant troop leader in troop 128 of Pequea, she attended the national Girl Scout Roundup at Button Bay, Vermont last summer. She is a members of the Mount Nebo Methodist Youth Fellowship and assists in the school nursery.

Theresa, the oldest of seven children, in addition to helping with the younger children at home, is working toward a college education in Home Economics

She considers the work with the other children good training for her life's work and often constructs clothes for her sisters' dolls. Sometimes, Theresa says, she tries out styles on the dolls before making the garment for herself

The contest was sponsored by the American Wool Council

Prices Received By Pa. Farmers Continued Above Last October

Prices Received by Pennsylvania farmers for their agricultural products continued above last year during the month ending October 15, according to the Pennsylvania Crop Reporting Service

The Index of Prices Received, which is a measure of the trend and changes of Prices Received by Farmers was 234 percent of the (1910-14=100) Base, compared with 235 a month earlier and 226 a year earlier. An increase in the price of wholesale milk was the main factor in offsetting slight declines in the prices of most other farm products from a month ago, thus holding farm prices relatively steady for that period The 4 percent increase in farm product prices over a year ago was mainly the result of the combined upswing in value of beef, hay, chicken, potatoes, apples, corn and wheat.

The Index of Prices Received for Livestock and Livestock Products held steady during the month ending October 15 Meat animal prices led by beef cattle and hogs declined. Prices Received for chickens showed a decline, but egg and turkey prices were constant through the month Balancing these lowered prices for meat animals and chickens was an increase in the price for milk. An advance in beef cattle and chicken prices was the basis for the livestock products index increase of one percent since last year

The Index of Prices Received for Crops dropped slightly from one month ago, but was 13 percent higher than a year ago During the month, the main influencing changes were lowered prices received for potatoes, wheat and apples coupled with higher prices for late cut vegetables

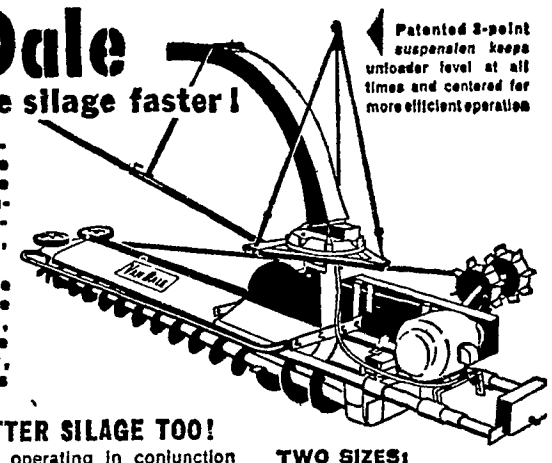
Get the BIG silo unloader value!

VanDale

Delivers more silage faster!



Patented 3-point suspension keeps unloader level at all times and centered for more efficient operation

- Double auger system digs the silage faster and more evenly under all conditions whether silage is frozen, wet, or dry.
- Exclusive, adjustable drive hub gives more positive traction, keeps the machine operating evenly, and requires less power.

DELIVERS BETTER SILAGE TOO!

The double augers, operating in conjunction with the patented V-paddle impellers, *digs* the silage, mixes it thoroughly, and then *throws* it down the chute. Your cows and cattle get good, *palatable silage . . . not a powdered mash* as so often happens with unloaders using blowers.

TWO SIZES:
Standard—for silos 10' to 16'
Heavy Duty—for silos 12' to 30'

mixture onto waxed paper into 6 balls Push several cubes of Cheddar cheese into center of each ball Meanwhile prepare Fricassee

Ham Fricassee

- ¼ cup (½ stick) butter
- 2 cups diced, cooked ham
- ½ cup chopped onion
- ½ cup chopped green pepper
- 2 cups bouillon or stock
- 1 cup milk
- ⅛ teaspoon crushed rosemary
- Dash of pepper
- Dash of nutmeg
- 1½ cups diced Cheddar cheese
- 3 tablespoons flour

In a large saucepan or pot, melt butter Saute ham onion and green pepper until lightly browned Add bouillon milk, rosemary pepper and nutmeg simmer about 5 minutes Drop Dumpling mixture by spoon into simmering Fricassee, cover and cook over medium heat about 15 minutes Remove dumplings to a warm casserole Stir Cheddar cheese into Fricassee until melted Add flour and cook, stirring constantly, until thickened pour over Dumplings and serve immediately.

* * * *

SWEET AND SOUR FRIED POTATOES

- ½ cup butter
- ½ cup chopped onion
- ½ cup chopped green pepper
- 3 pounds potatoes, cooked and sliced
- 2 teaspoons salt
- ¼ teaspoon black pepper
- ¼ cup vinegar
- 1 tablespoon water
- 2 teaspoons sugar
- 1 teaspoon dry mustard

Saute onion and green pepper in butter Add potatoes, sprinkle with salt and pepper Brown potatoes slowly turning occasionally When browned, add vinegar mixed with water, sugar and dry mustard Serve warm to 6

(Continued from Page 9)

cords to produce stunning new effects In yardgoods, one of the most elegant new corduroys has a wavy rib and a deep velvety pile Two other cuts have unusual textures . . one has ribs that resemble cable stitches and another is woven to produce a link cord effect More and more designers are choosing the wide wale cuts for the new spare-shaped fashions

This an' That

A well-flavored cream sauce is a basic in all good cooking Its creamy texture and bland flavor makes it an ideal base for dozens of dishes, including soups, main dishes, and vegetables Milk, one of the major ingredients in a cream sauce, contributes essential nutrients to the dish in which it's used

Enhance your savory meat stew with a topping of parsley pinwheels Roll out biscuit dough to a rectangle, brush with melted butter, sprinkle with chopped parsley Roll up like a jelly roll and cut in slices Place the slices — cut side up — on top of the hot stew and bake until biscuits are crusty brown.

INCREASE MILK PRODUCTION UP TO $100 A YEAR . . .
for only pennies extra per day!

RED ROSE® RUMENATOR PELLETS

A high nutrition "booster feed" that has proved its ability to increase production levels of dairy and beef cattle.

Excellent booster or appetizer for dairy and beef animals of all ages. Keeps herds in top condition and provides an energy and vitamin lift during periods of stress, or to increase production. Fortified with vitamin A, vitamin D2, vitamin E, animal fat and minerals.

MADE ONLY BY JOHN W. ESHELMAN & SONS!

Improves Appetites - Increases Milk Production - Maintains Peak Milk Production for Longer Periods - Gets Cows in Better Condition for Calving - Glossier Haircoats, Thinner Skins - Young Stock Grows Faster, Gains Better - Helps Avoid Production Drops in Cold Weather.

Corn Picking Time ?

Take Advantage of Our Grain Bank and Grain Storage Program For Your Corn Harvest

● SPECIAL BENEFITS OF OUR GRAIN BANK PROGRAM

All grains stored under this program can be returned to the grower in any form of poultry or livestock feed, by using one of the various concentrate programs. There is no livestock or poultry feed that this concentrate and grain program does not cover.

There will be storage available for corn, which can be picked and shelled at harvest time, brought to the mill, dried and stored here for later use.

Faster service now available due to new bulk unloading system. Information available on custom work with new picker-sheller machines.

Every year more and more customers use the Grain Bank and find it the easiest and most economical way to handle their local grown corn.

Awards Given At Banquet

Three directors were elected for two year terms at the annual banquet of the Lancaster County Guernsey Breeders Association last Friday night at Rhoads Spanish Tavern Quarryville

The new directors are Richard Maule Quarryville R2 Paul Witmer, Willow Street, and Robert Breneman, Strasburg

Six Guernsey herds in the county finished the DHIA testing year with more than 500 pounds of butterfat per cow The 47 cows in the herd of Raymond and Louise Witmer Willow Street R1, was again tops in the Dairy Herd Improvement Association averages with 12,225 pounds of milk and 621 pounds of butterfat per cow

In a classification for herds under 25 cows the 18 cows of David Breckbill, 1101 Beaver Valley Pike, had the high average with 10,291 pounds of milk and 510 pounds of butterfat

The other four herds with more than 500 pounds of fat belong to Rohrer Witmer Willow Street R2, 10,741 pounds of milk and 540 pounds of fat Harry Mumma, Manheim R1 10,801 pounds of milk and 526 pounds of fat Robert Breneman Strasburg, 10,437 pounds of milk and 520 pounds of fat and Paul Witmer, Willow Street, 10,076 pounds of milk and 503 pounds of butterfat

Individual cows in the Raymond Witmer herd won six out of eight awards for high milk and butterfat records. Pen Del Guernseys were top award winners in the two-year-old division for both milk and butterfat production, in the three-year-old division a Pen Dell Cow won the milk production award and in the aged cow class, the butterfat award An Excellent 16-year old Pen Del cow won both milk and butterfat production awards for lifetime production

A three year old in the herd of Rohrer, Witmer took top honors for butterfat production, while an aged cow in the herd of John Landis, 1804 Hempstead Road, had high milk production in that division

Greetings and remarks were brought from the state Guernsey Association by Sam Minor and William Juzi Harry Mumma, county association president was toastmaster

AWARD WINNERS AT THE GUERNSEY BANQUET last Friday night are, left to right, Raymond Witmer, Willow Street R1; David Breckbill, Beaver Valley Pike, Lancaster; John Landis, 1804 Hempstead Road, Lancaster, and Rohrer Witmer, Willow Street R2. Cows in Raymond Witmer's herd won the award for highest milk and butterfat production in the two year old class, for milk production in the three year old class, for fat production in the aged cow class, and for both milk and butterfat lifetime production His herd also had the high average for herds over 25 cows Breckbill's herd had high average for small herds. Rohrer Witmer's three year old cow had high butterfat record. John Landis' aged cow had high milk record. L. F. Photo.

● Hay Show

(Continued from Page 1)

took a first place award in mixed hay with over half legumes and second place awards in second cutting alfalfa and alfalfa-Grass mixed classes

The only other countian placing in the contest was Harold Wenzel Ephrata R1, who took a second place award with a slice of first cutting grass — field cured

The show, one in a series of five was conducted by Penn State's extension service with the cooperation of 23 supporting organizations Dr John E Baylor extension agronomist was due for of the show

All first second and third place winners will be entitled to free chemical analysis of the hay exhibited The analysis is being made at Penn State

Winners of first three places in each class, and only they will be eligible to exhibit in the same classes at the 1963 Pennsylvania State Farm Show next January in Harrisburg All awards at the state show will be made on the basis of both visual and chemical evaluation

George Berggren extension agronomist who has judged all five of the district shows said field cured samples this year lacked quality generally, but the heat cured samples were high in quality He said farmers generally did a good job of curing their hay this year but many of them, in an attempt to get more pounds of the drought stricken forage waited until the crop was too mature before cutting

Berggren said the Crouse sample would have to beat out two excellent samples from Bradford and Westmoreland Counties to win the state show.
